EDUCATION

University of Hyderabad

M.Tech. - CGPA - 7.8

Jul'19 - Jun'21 (Dropout)

Hyderabad, India

Jamia Millia Islamia University

B.Tech. - CGPA - 8.6

Jul'13 - May'17

Delhi, India

TECHNICAL SKILLS

Languages: Python, HTML, CSS, Javascript

Developer Tools: VS Code, Sublime Text, Postman

Technologies/Frameworks: Flask, ReactJS, SpringBoot, TailwindCSS, Sanity CMS, Firebase, Github

PROJECTS

ImageGallery | ReactJs, TailwindCSS, UnsplashAPI

<https://image-gallery-xi-six.vercel.app/> 

- ImageGallery is a fully-responsive SPA which display images in a Masonary Layout fetched from Unsplash APIs .
- Developed search and dark Mode functionality. User can search images for any keyword. User can click on any image in the gallery to view in a Modal and also see all the image related info.
- <https://github.com/mdasf/ImageGallery>

TrackBollywood | ReactJs, CSS, Firebase

<https://trackbollywood-8b08e.web.app/> 

- Developed a webapp for tracking news in entertainment industry. Every story is associated with tags, making it easier to track news for the same tag.
- Developed a Admin Panel seperately to manage story content having functionality to add, edit, delete content. Firebase storage is used to store the images and Firestore Database is being utilized to store the details related to story.
- <https://github.com/mdasf/TrackBollywood>

Analytic Dashboard | Python, Flask, MySQL, ReactJS, TailwindCSS, ChartJS

- Built a fully-responsive analytic dashboard for insights dataset using TailwindCSS. Flask is used to setup backend and exposing APIs communicating with MySql database.
- ChartJs library is used to incorporate interactive and dynamic charts in the dashboard. Filtering capability is also added based on parameters given in Insights dataset.
- <https://github.com/mdasf/Analytic-Dashboard>

TechBlog Web App | ReactJS, TailWind CSS, Sanity CMS

<https://akibdev-mdasf.vercel.app/> 

- Developed a Responsive tech blog Web app using ReactJs and TailwindCSS. Content management is done using Sanity CMS. Web App is hosted on Vercel.
- <https://github.com/mdasf/Tech-Blog>

Youtube Clone | ReactJS, CSS, Rapid API

<https://joyful-palmier-ea5e09.netlify.app/> 

- Built various functionalities such as to list popular videos on HomePage, filtering videos based on category and search using full text search.
- Youtube's Rapid APIs were integrated using axios library to fetch and listing down the video feed.
- Material UI has been used for styling different components. Project has been deployed on Netlify.
